DETAILED ACTION

Election/Restrictions

Claims 2, 3, 12, 13, 31, and 32 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 10.

Applicant's election with traverse of Species C in Paper No. 10 is acknowledged. The traversal is on the ground(s) that at least one claim (e.g. claim 9) is generic to all species. This is not found persuasive because the species restriction is still valid regardless of whether the case contains generic claims. If certain claims are determined to be generic and allowable, then indeed applicant will be entitled to bring back any non-elected claims that the generic claim reads on.

The requirement is still deemed proper and is therefore made FINAL.

Claim Objections

Claim 19 is objected to because of the following informalities: it appears that applicant has transposed the language of claim 19. Claim 19 claims that the closed fluid chamber volume is greater than the open fluid chamber volume. This is contrary to other claims, such as claim 5, which are opposite. Applicant is requested to check the

Art Unit: 3763

language of claim 19 for accuracy and perhaps provide clarifying amendments if necessary.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-11, 14-21, 23-30, and 33-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Fangrow, Jr. et al. (US 6,245,048).

Fangrow teaches all the claimed subject matter in figures 22 and 23, showing movable cannula 355.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fangrow, Jr. et al.

Art Unit: 3763

Fangrow teaches all the claimed subject matter, and teaches the orthogonal relationship between the inlet and outlet as claimed in claim 22. (figures 49 and 50) It would have been obvious to make the embodiment shown in figures 22 and 23 with the orthogonal relationship shown in figures 49 and 50, to enable valving in an angled fitting as is well-known in the art.
